You have assets that are no longer useful

Assets (wind turbines, trafo, switchgear...)

Whole facilities (wind farms...)

We can assess your stock through prediction models

We classify those assets and manage them according to all regulations

If they are in good condition, we sell them

If necessary, we can remove, dismantle, transport or scrap them.

We provide a second life, remanufacturing wind turbines and components

We look for buyers all over the world to make sure you get the highest revenue in market from your assets

We find buyers for your assets in order to:

Provide a second purpose to the asset and decrease the environmental impact

Generate revenue!

We make sure the value is fair to buyers but also the highest possible for you

We manage the sales process

Support for buyers

Query management

Product exhibition

Documentation management: authorizations, licenses...

- Auctions
- Direct negotiating

What is happening with those profits?

It pays for the whole process, from the beginning to the end.

We take percentage
